

Blood Pressure Case Reports Journal

[Blood Pressure Case Reports Journal](#) publishes Images in Blood Pressure, Case Reports in Blood Pressure Journal, Videos in Blood Journal, Heart Flow Journal etc. Blood Pressure Case Reports Journal is an Open access, Peer review journal intended to publish articles of high scope and importance for the society. It encompasses variety of fluctuations involved in the Blood pressure of an individual. Its main aim is to impart knowledge and publicize research work of eminent scientists and research scholars regarding overall functionality and effects of Systolic and Diastolic Blood Pressure in the human body. It also communicates the major reasons leading to the improper blood circulation leading to Hypertension or Hypotension and finally effective action on the related organs.

Blood Pressure Case Reports Journal welcomes Case reports, Short communications, Editorials, Commentaries etc and provide complete access to information for any kind of research or review purpose. Blood Pressure Case Reports Journal with its broad perspective provides insights into all major and minor effects of improper blood flow, variations in the blood flow leading to Hypertension and Hypotension and its consequences on various parts on the body.

Blood Pressure Case Reports Journal broadly focuses on impact of Hypertension heart, including Arteriosclerosis, Atherosclerosis, Angina Pectoris, Arrhythmias, Left ventricular hypertrophy, Heart failure, Sudden Cardiac death, Brain Transient ischemic attack (TIA), Stroke, Dementia, Mild cognitive impairment.

- Kidneys- Nephropathy, Kidney failure, Glomerulosclerosis, and Kidney artery aneurysm.
- Eyes- Retinopathy, Choroidopathy, Optic Neuropathy
- Sexual Dysfunction- Erectile dysfunction.

Hypotension or decrease in the blood pressure may lead to numerous diseases/disorders such as; kidney Failure, Diverticulitis (Diverticulosis, Diverticular Disease), Diarrhea, Anemia, Pulmonary Embolism (Blood Clot in the Lung), Deep Vein Thrombosis (DVT), Congestive Heart Failure (CHF) Vertigo, Pancreatitis, Dizziness,

Internal Bleeding, Kidney Infection (Pyelonephritis), Premature Ventricular Contractions (PVCs), Fainting (Syncope), Atrial Fibrillation (AFib), Dry Mouth (Xerostomia), Orthostatic Hypotension, Nausea and vomiting, Toxic Shock Syndrome (TSS), Myocarditis, Paroxysmal Supraventricular Tachycardia (PSVT) are a few exposed topics of interest of the journal.

Manuscript Submission

Authors may submit their manuscripts through the journal's online submission portal:

<https://www.cardiologycasereportsjournal.org/submit.html>

(or) Send an e-mail attachment to the Editorial Office E-mail Id: editor.clinical@cardiologycasereportsjournal.org

Systolic Blood Pressure Case Reports Journal

The blood pressure when the heart is contracting. It is specifically the maximum arterial pressure during contraction of the left ventricle of the heart. The time at which ventricular contraction occurs is called Systole.

Journals related to Systolic Blood Pressure: Journal of Human Hypertension, Blood Pressure Monitoring, Kidney and Blood Pressure Research, Blood Pressure Supplement, High Blood Pressure and Cardiovascular Prevention, Integrated Blood Pressure Control, Electrolyte and Blood Pressure

Diastolic Blood Pressure Case Reports Journal

The Diastolic Blood Pressure number or the bottom number indicates the pressure in the arteries when the heart rests between beats. A normal diastolic blood pressure number is 80 or less. A diastolic blood pressure between 80 and 89 is normal but higher than ideal.

Journals related to Diastolic Blood Pressure: American Journal of Kidney Diseases, American Journal of Hypertension, The American Journal of Cardiology, American Heart Journal, Journal of Vascular Surgery, Hypertension Research – Nature, Archives of Clinical Hypertension, Annals of Clinical & Experimental Hypertension

Arteriosclerosis Case Reports Journal

Arteriosclerosis is the thickening, hardening and loss of elasticity of the walls of arteries which may be due to degenerative changes in the arteries, blood vessels that carry oxygenated blood from the heart to other parts of the body become narrowed because fat is first deposited on the inside walls of the arteries, then becomes hardened by fibrous tissue and calcification.

Journals related to Arteriosclerosis: Arteriosclerosis Thrombosis and Vascular Biology, Journal of Vascular Surgery, American Heart Journal , Clinical Neurology and Neurosurgery, European Journal of Vascular Surgery, Circulation, New England Journal of Medicine.

Arrhythmias Case Reports Journal

Arrhythmias are heart-rhythm problems they occur when the electrical impulses to the heart that coordinate heartbeats are not working properly, making the heart beat too fast/slow or inconsistently. Many heart arrhythmias are harmless.

Journals related to Arrhythmias: Journal of Arrhythmia, Arrhythmia Therapy Journals, Circulation: Arrhythmia and Electrophysiology, Journal of Arrhythmia-Science direct, European Heart Journal, New England Journal of Medicine, Japanese Heart Rhythm Society.

Angina Pectoris Case Reports Journal

Angina pectoris is the clinical term for chest pain or discomfort due to coronary heart disease. It occurs when the heart muscle doesn't get as much blood as it needs. This usually happens because one or more of the heart's arteries is narrowed or blocked, also called ischemia.

Journals related to Angina Pectoris: Cardiology Journal, Ethnicity & Health, Angina pectoris - The American Journal of Medicine, The Journal of American Osteopathic Association, Journal of American College of Cardiology, American Heart Journal, Journal of Cardiovascular Pharmacology, Clinical Cardiology, American Journal of Cardiology.

Glomerulosclerosis Case Reports Journal

Glomerulosclerosis refers to a hardening of the glomerulus in the kidney. It is a general term to describe scarring of the kidneys tiny blood vessels, the glomeruli, the functional units in the kidney that filter urine from the blood.

Journals related to Glomerulosclerosis: Kidney & Blood Pressure Research, American Journal of Hypertension, Portuguese Journal of Nephrology and Hypertension, Journal of the American College of Cardiology, American Journal of Cardiology, The Israeli Bilingual Journal of Hypertension, High Blood Pressure & Cardiovascular Prevention, Journal of Clinical Nephrology and Research, Blood Pressure Monitoring, Journal of Integrated Blood Pressure Control.

Nephropathy Case Reports Journal

Kidney disease, also known as Nephropathy, means damage to or disease of a kidney. Nephrosis is non-inflammatory nephropathy. Nephritis is inflammatory kidney disease. Diabetic nephropathy is a complication of diabetes that is caused by uncontrolled high blood sugar.

Journals related to Nephropathy: Diabetes Management, Diabetes Research and Clinical Practice, Diabetes Self-Management, Diabetes Spectrum, Diabetes Technology & Therapeutics, Diabetes und Stoffwechsel, Diabetes Week, Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy, Diabetes, Obesity and Metabolism, Diabetes, Stoffwechsel und Herz, Diabetes/Metabolism Research and Reviews, Diabetic Foot & Ankle (DFA), Diabetic Medicine, Diabetologia.

Congestive Heart Failure Case Reports Journal

Congestive Heart Failure is a chronic condition that affects the four chambers of the heart. Early symptoms include fatigue and weight gain, occurs when the heart muscle does not pump blood.

Journals related to Congestive Heart Failure: Kidney & Blood Pressure Research, American Journal of Hypertension, Portuguese Journal of Nephrology and Hypertension, Journal of the American College of Cardiology, American Journal of Cardiology, The Israeli Bilingual Journal of Hypertension, High Blood Pressure &

Cardiovascular Prevention, Journal of Clinical Nephrology and Research, Blood Pressure Monitoring, Journal of Integrated Blood Pressure Control.

Hypertension-Elevated Blood Flow Case Reports Journal

Hypertension-Elevated Blood Flow known as high blood pressure or arterial hypertension, is a chronic medical condition of measurement of the force of blood flow against the walls of arteries as the heart pumps blood through out our body due to psychological stress, overweight or obese, Genetics, alcohol consumption, Lack of physical activity etc.

Journals related to Hypertension: American Journal of Hypertension, Journal of Human Hypertension, Current Opinion in Nephrology and Hypertension, Hypertension Research, Current Hypertension Reports, Journal of Hypertension, Supplement, Journal of Clinical Hypertension, Clinical and Experimental Hypertension, Hypertension in Pregnancy, Journal of the American Society of Hypertension, International Journal of Hypertension, Current Hypertension Reviews, Pregnancy Hypertension, Open Hypertension Journal, Hypertension Research, Current Hypertension Reports, Journal of Human Hypertension, Journal of Hypertension.

Orthostatic Hypotension Diabetes

When the body changes position, a variety of actions occur involving all parts of the cardiovascular system as well as the autonomic nervous system that helps regulate their function. It is especially important for the body to push blood upward and supply the brain with oxygen.

Journals related to Orthostatic Hypotension Diabetes: Hypertension Research, Current Hypertension Reports, Journal of Hypertension, Journal of Clinical Hypertension, Clinical and Experimental Hypertension, Hypertension in Pregnancy, Journal of the American Society of Hypertension, International Journal of Hypertension, Current Hypertension Reviews, Pregnancy Hypertension

Idiopathic Intracranial Hypertension

Idiopathic Intracranial Hypertension, sometimes called by the older names benign intracranial hypertension or pseudotumor cerebri, is a neurological disorder that is

characterized by increased intracranial pressure in the absence of a tumor or other diseases.

Journals related to Idiopathic Intracranial Hypertension: Open Hypertension Journal, Hypertension Research, Current Hypertension Reports, Journal of Human Hypertension, Journal of Hypertension, Portuguese Journal of Nephrology and Hypertension, Journal of the American College of Cardiology, American Journal of Cardiology.
